TOWNSHIP OF LOWER

To: Mike Laffey, Township Manager  
From: Margaret Vitelli, QPA  
Date: October 11, 2022  
Re: 2022 Southern Regional Cooperative Natural Gas Bid Results

---

The Township participates in the Southern Regional Cooperative Agreement (SJPC) with Camden County as the lead agency for natural gas. Concord Energy Services is the Energy Market Management Team to administer, monitor the bidding process. Collectively there are over 100 Municipalities and Counties that have been participating in this regional effort since 2010. With the deregulations of natural gas and electric it has given Municipalities an opportunity to combine our energy needs to get the best possible price collectively.

The current Natural Gas Co Operative contract rate of \$4.176/dth and is set to expire on November 30, 2022. According to the attached memo due to the volatile market the retail natural gas bid came in much higher than in any year since we have participated in the Program.

UGI Energy Supply was awarded based on Rate Code (3A) and the Bid Group (3A) Category Rate of \$12.334/dth. SJPC has authorized by Resolution to award for the Natural Gas Supply Contract for a much shorter, (12) Twelve Month term which will expire on November 30, 2023.

SJPC and Concord Energy Services will continue to monitor the market to determine the best time to rebid based on future market rate opportunities.

If you have any questions, please feel free to contact me.

RE: SJPC A44-22 Natural Gas Bid Summary and Results  
Cc: Vicki Molloy, Concord Energy Services  
Kim Coulter, Concord Energy Services

The County of Camden, as lead agency to the South Jersey Power Cooperative (SJPC), received bids for retail natural gas supply service on September 13, 2022. This overview provides a summary of the bid information and results which are much higher this year than the current contract which will expire November 30, 2022. This is mainly due to the natural gas market prices which have spiked to a 14 year high along with electricity and fuel oil pricing. The pandemic brought about a historic drop in energy demand and prices, but recovering demand is now straining fossil fuel markets for oil and gas, and even coal. Prices are skyrocketing as demand chases fuel supply that has not yet recovered from the pandemic drop. In addition, increases we have been experiencing since 3Q 2021 have been due to many factors such as weather (Hurricane Ida last summer knocked out production), an extremely hot summer in 2022, forecasts for another very cold winter for 2022 – 2023 and continued high demand for domestic production of Liquefied natural gas “LNG” for export to foreign countries needing fuel sources for the upcoming winter season.

Rest assured, we are continuously watching the market for opportunities to lower your energy costs and when the time is right, we plan to go back out to bid. If you have any questions concerning this document, you may feel free to contact me or Kim Coulter of Concord Energy Services directly (contact information below).
